## Education

**Chandigarh Group of Colleges**, Landran, Mohali, Punjab 2020 – 2024  
Bachelor of Technology in Computer Science (B.Tech in CS), *SGPA: 7.31*

**Suraj School**, Gurugram, Haryana 2019 – 2020  
12th in Non-Medical, *Percentage: 91.4%*

## Technical Skills

**Cloud Services:** AWS - Lambda, S3, SQS, EC2, API Gateway, Cognito, ECS, EFS, ECR, CloudFront, ACM, Route53, WAF, IAM, AWS Organizations, CloudFormation, CodeDeploy, CodePipeline, Fargate, RDS. OCI

**DevOps Tools:** Jenkins, Docker, Kubernetes, ELK, Wazuh, Prometheus, Grafana SonarQube, CheckMarx, GitHub Actions, BitBucket, Terraform, Packer, Ansible, RabbitMQ, Nginx, APISIX, Cloudflare, Artifactory

**Scripting & Administration:** Python, Shell, Bash, Mysql, Linux Administration, YAML, JSON

## Work Experience

**DevOps Engineer L1 — Scoreme Solutions**, Gurgaon June 2025–current

- Designed and implemented a fully secure and private hub-spoke AWS architecture for FinTech projects, ensuring network isolation, data privacy and centralized observability.
- Containerized Java-based applications into Docker images stored on Amazon ECR and deployed on AWS Fargate, improving scalability and deployment consistency.
- Integrated ELK Stack, Prometheus and Grafana for real-time application, API, and system-level monitoring across all environments.
- Migrated core monolithic application into 12 independent microservices running on Lambda and Fargate communicating via Amazon SQS for high availability and modularity.

**DevOps Trainee — Monotype Solutions**, Noida (Hybrid) Aug 2024 – Feb 2025

- Integrated SonarQube, CheckMarx SAST & SCA into CI/CD pipelines across 250+ GitHub repositories, improving DevSecOps compliance.
- Saved \$40K by automating resource optimization, migrating EBS (gp2→gp3), and archiving data to S3 Glacier.
- Led migration of Dockerized Reportportal (QA app) from on-premises to AWS.
- Automated provisioning using Terraform & Ansible, cutting manual effort by 60%.

**DevOps Intern — Amway**, Gurgaon (Hybrid) Jun 2024 – Aug 2024

- Automated deployments of 11 microservices using Shell scripts & AWS CodePipeline.
- Built Lambda-based monitoring with CloudWatch for automatic health checks and real-time alerts.
- Designed secure MFA sign-in with AWS Cognito for internal applications.

## Projects

### Serverless Web App

- Built a scalable serverless web app using AWS Lambda, DynamoDB, S3, API Gateway, and CloudFront for CRUD operations.
- Integrated Cognito for authentication and authorization; frontend on S3, backend with Lambda (Python).

### CloudStackOps

- Developed Flask REST API with MySQL (RDS) and AWS infrastructure (VPC, Subnets, Route53, ACM).
- Automated provisioning via Terraform; CI/CD pipeline with Jenkins and GitHub.

## Certifications

Oracle Cloud Infrastructure 2025 Certified DevOps Professional
